

EveryBODY Buckle Up

safetytown.com.au

To my family,

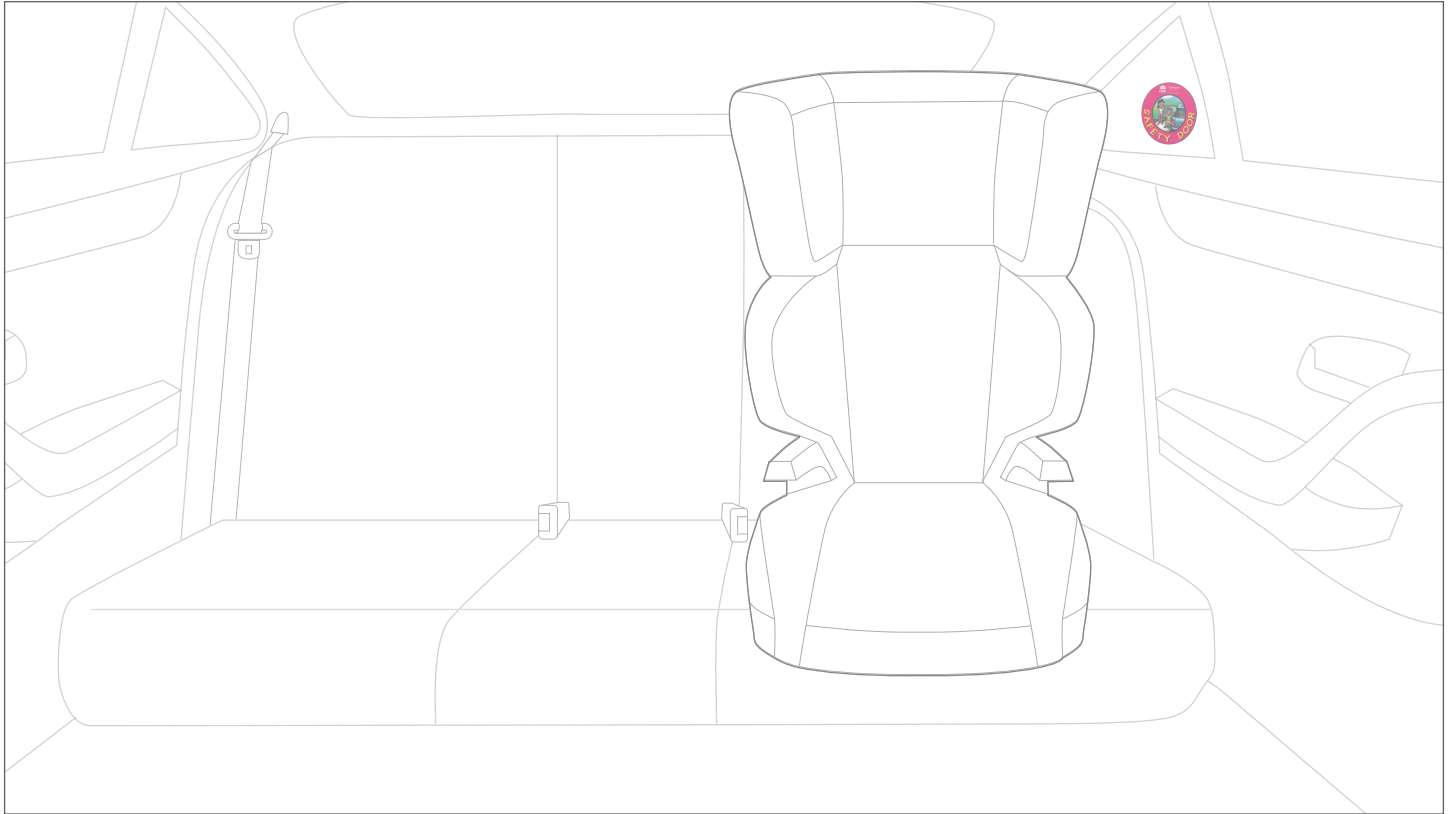

Today I completed the **EveryBODY Buckle up** e-puzzle. I learnt that when I'm buckled up in the right car seat for my age and size, I'm well protected if we crash.

This is because the seatbelt crosses the strong bones of my skeleton and protects my organs from being damaged. To keep me safe please buckle me up in the right car seat for my age and size on every trip!

Name _____

Draw a picture of yourself safely buckled up in the booster seat.

Write about one of your favourite car trips.
